Policy # 1866039-08

Ms. Krista Wood
Advanced Chemical Transport (ACT)
1210 Elko Drive
Sunnyvale, CA 94089

SAFETY AWARD FOR ADVANCED CHEMICAL TRANSPORT.

To: The Safety Management Team at Advanced Chemical Transport,

A Safety Award is being presented on your behalf and all Advanced Chemical Transport staff who played a role in your organization's excellent loss history and loss ratios for policy years 2001 to 2005. The Safety Award is designed to acknowledge the efforts that you and your staff have exemplified during this policy period. Your incurred loss ratio for this period was at or below 1% which is **extraordinary** for a firm of your size and is far below the industry average in loss ratio percentage for an organization in your industry sector.

While working with you as the safety consultant for Advanced Chemical, your attitude and proactive approach to safety was admirable and your excellent loss ratio and injury record is a direct reflection of that. I also commend your staff for taking a positive approach to safety and executing them on a daily basis. As you well know, safety is a conscious team effort and can only work successfully when everyone practices and understands the importance of a solid safety curriculum. You have been very successful in your pursuit of ensuring that everyone at Advanced Chemical works in a safe and secure work environment and I applaud all of your persistence and hard work to achieve this goal.

Again, I want to applaud the safety team and the entire Advanced Chemical staff for their continued commitment to safety. I wish your superb organization a most prosperous and successful future.

Kind regards,

James Kilpatrick
Loss Control Representative
